

UNIVERSITY OF CALIFORNIA, RIVERSIDE

Student Learning Outcomes for the B.A./B.S. in Entomology

Students completing the B.A./B.S. major will be able to:

1. gain an understanding of the natural history, anatomy, physiology, ecology, behavior, systematics, identification, biodiversity, and manipulation of insects
2. identify insect orders and common families of insects
3. obtain training in the theory and application of research methods in entomology
4. demonstrate scientific literacy and writing skills as well as the ability to critically evaluate concepts in entomology
5. prepare for a career in the entomological sciences
