Workshop Outcomes

- Participants will be able to differentiate between typical and alternative assessments
- Participants will be able to define authentic assessment
- Participants will be able to identify an alternative and typical assessment for outcome evaluation
Assessment Cycle (Process)

1. Identify Outcomes
2. Gather Evidence
3. Analyze Evidence
4. Provide Learning Opportunities
5. Share Results
6. Use What you Learn
Assessments (Tool)

- Assessments (evaluations) are the tools we use to collect evidence of student growth. (surveys, papers, presentations)

**Learning Outcomes**
- Essays
- Projects
- MC Exams
- Presentations
- Labs
- Demonstrations/Exhibits/Performances

**Implementation Outcomes**
- Counts
- Meeting Minutes/Documents
- Web analytics

**Satisfaction Outcomes**
- Surveys
- Focus Groups
- Interviews
Why Alternative Assessments

Teri Balser
Interim President and Vice-Chancellor Dalhousie University, Halifax Nova Scotia
Authentic Assessment

**Authentic assessment** is the measurement of "intellectual accomplishments that are worthwhile, significant, and meaningful," as contrasted to multiple choice standardized tests. **Authentic assessment** can be devised by the teacher, or in collaboration with the student by engaging student voice.

Tapping into Your Own Activities

1. Identify an outcome you want to assess.
2. List the activity that you will use to help participants achieve the outcome.
3. Identify something that you already do to determine if the outcome has been met.
4. Think of an alternative form of assessment and list it as well.
5. Describe how you will know if the outcome has been met.

When discussing this with a partner, think about the following:
- Why did you choose the alternative assessment?
- What are the pros/cons of the alternative assessment?
